- HIGHER SECONDARY IN COMPUTER SCIENCE

  VMHSS Vadavannur - Palghat, Kerala 2017 to 2019

PROJECT

RENT A HOME

The RENT A HOME Application is a web platform built with HTML, CSS, Python, and Django to streamline home rentals. It offers an intuitive interface for landlords to list properties with detailed descriptions, images, and prices, and for renters to find homes using filters like location and price. Secure authentication allows users to manage profiles, while a booking system facilitates rental requests and approvals. Responsive design ensures usability on all devices. Features include a review system for transparency and a Django admin interface for efficient management. This project aims to deliver a reliable and user-friendly rental.
